

BYTRONIC 360° BARCODE READER

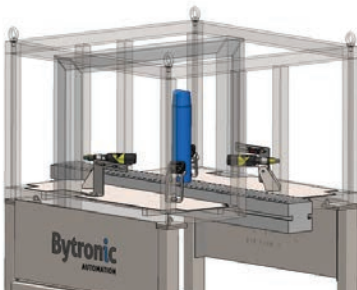

Bytronic 360° Barcode Reader is versatile: it fits many production lines and is suitable for a wide range of products.

The system can read 1D and 2D codes on cylindrical products with minimal spacing and no need for product orientation.

BEST FOR:
NON-CONTACT BARCODE READING
NO NEED FOR PRODUCT ORIENTATION

A guarantee that
your barcode is
correct and
readable

Modular
design which
fits around
your conveyor

Minimal downtime
needed for
installation

HMI Unit can be
remote

Communicates via
Industrial Protocols

Benefits

- ✓ Every barcode is inspected and checked against the SKU being produced
- ✓ Can be set up in a variety of automatic ways or manually by the operator
- ✓ Mis-matches and no-reads can cause rejection or line stop depending on setup
- ✓ Existing reject stations can be used, or the system can have a rejector attached
- ✓ The target is surrounded by scanners so no need for product orientation
- ✓ Simple graphical HMI displaying the reason for any rejects
- ✓ Throughput of 36,000 products/hour
- ✓ Reads 1D and 2D barcodes
